

Ph.D. Research Centre in Commerce

In the Subject of

Business Economics

Introduction:

A Ph.D. in business economics and related disciplines looks at how factors like economic theories relate to a company's structure and productivity etc influence in today's business environment. The programs include training in areas like microeconomics and statistics and other areas of national and international application of business economics.

Program outcome:

The doctorate program in business economics renders candidates a comprehensive outlook about the business world by building their foundation in the areas of economic principles, decision making, advising concepts related to business as well as learning the essential principles with efficiency.
